### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Thurwanger et al. (US 5,619,754). Thurwagner et al. (hereinafter Thurwanger) discloses an inner shell including a liner member (18) opened at upper and lower parts thereof and an impact absorbing member (38) surrounding a circumference thereof, col. 5, lines 1-9. Also, a plurality of first and second holes (34) are passed through front and rear walls by attachment bsushings (36) as shown in figure 5.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3765

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thurwanger.

With regard to claim 3, it would have been obvious that absorbing material of Thurwanger can be made of foam, etc so that force of impact can be absorbed and dissipated as required for a particular end use thereof.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thurwanger in view of Sibley et al. (US 5,298,208).

Thurwanger discloses the invention as set forth above except for showing the inner shell being formed by molding process.

Sibley et al. discloses a process of forming a shell by molding as shown in figures 4-7.

It would have been obvious to one skilled in the art at the time the invention was made to recognize that the inner shell of Thurwanger is made through a molding process as taught by Sibley in order to make the device cost effective and integral as a single unit for maximum protection.

.

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
